

What is Liqui-Cover HD/Hydroshield HD?

Liqui-Cover HD/Hydroshield HD is a unique liquid which spreads over the surface of water to form a very thin film to reduce evaporation. Severe wind will cause it to move around slightly, but it will reestablish covering the area when the wind subsides. It is applied by simply pouring it onto the water surface.

Is Liqui-Cover HD/Hydroshield HD Safe?

Yes it is. The components of Liqui-Cover HD/Hydroshield HD are safe chemicals, and are used in many food and pharmaceutical applications

Evaporation – How Much Water Do I Lose?

Evaporation is the single largest cause of water loss – calculations and experience show up to 10 mm/day (0.375") are lost. This can amount to 1000's of liters of water per day. Wind, relative humidity, and water temperature are the major factors influencing evaporation.

How Much Water Will I Save?

Independent trials using Liqui-Cover HD/Hydroshield HD show that evaporation can be controlled up to 95%

Application Methods

Liqui-Cover HD/Hydroshield HD can be applied directly from the container onto the water. It will spread rapidly across the surface. For larger storage ponds, the use of a boat or an aerial application may be used.

Application Rates

Regardless of the water depth, application rates of 40 mL/m² of surface area (40 litre per 1,000 sq metres) every 4 weeks provides up to 95% reduction in evaporation (in fresh water).

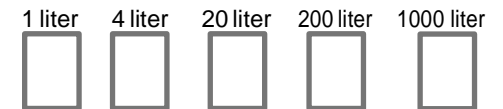

Storage and Handling

Liqui-Cover HD/Hydroshield HD is classified as non-hazardous and non-toxic. Use reasonable care and store in a warm place away from oxidizing materials.

First Aid

Keep out of reach of children. Avoid contact with eyes. If swallowed seek medical attention and treat symptomatically. Flush eyes with water.
